

Yash.

Web design & front-end development

AI-assisted development for responsive landing pages, storefront interfaces, and practical business dashboards. Working concepts demonstrate the services, interactions, and source code available for handover.

Public account details pending verification

SERVICES DEMONSTRATED

Responsive HTML and CSS / JavaScript interfaces / Landing pages Storefront UI / Dashboard UI / Browser testing

SELECTED CONCEPT PROJECTS

01 / Casa Sol

A boutique hospitality site with editorial typography, original imagery, responsive layouts, room-detail dialogs, and a stay-price calculator. Date, capacity, and price rules are validated before an estimate is shown.

[Open working demo](#)

HTML / CSS / JAVASCRIPT / INPUT VALIDATION

02 / Morrow Goods

An artisan ceramics storefront with category filters, price sorting, product details, a persistent shopping bag, and an order-summary download. Integer-based price calculations and saved-cart validation support the demo.

HTML / CSS / JAVASCRIPT / LOCAL STORAGE

03 / Ledger Lane

An invoice dashboard with calculated collected, outstanding, and overdue totals; month and status filters; client search; local invoice entry; and CSV export with spreadsheet-formula protection.

HTML / CSS / JAVASCRIPT / DATA INTERFACES / CSV EXPORT

WORKING METHOD

Agree the audience, scope, and deliverables first. Build the design and interaction together. Check real user flows and responsive layouts. Deliver source and setup notes. AI assists implementation; deliverables are reviewed and tested.

Original demonstrations for fictional brands, not past client commissions. No employment history, qualifications, testimonials, or performance results are claimed.
