PROJECT-BASED CV / INDEPENDENT WEB STUDIO

Yash.

Web design & full-stack development

AI-assisted development for responsive websites and practical product interfaces. The portfolio includes a live full-stack background-removal product plus working concepts, accessible interactions, and source that can be handed over.

SERVICES DEMONSTRATED

- Responsive HTML & CSS
- JavaScript interfaces
- Full-stack web products
- Firebase authentication
- Cloudflare Worker APIs
- Browser testing

SELECTED PROJECTS

01 / Clearcut

A live browser-based background-removal product with responsive upload and result flows, Google sign-in, and a Cloudflare Worker API backed by D1. Image processing stays on the user's device.

Open live product · View source

VITE · FIREBASE AUTH · CLOUDFLARE WORKERS · D1

02 / Casa Sol

A boutique hospitality website with editorial typography, original imagery, responsive layouts, native room-detail dialogs, and a validated stay-price calculator.

Open working demo · View calculator source

HTML · CSS · JAVASCRIPT · INPUT VALIDATION

03 / Morrow Goods

An artisan ceramics storefront with category filtering, price sorting, product details, a persistent shopping bag, and integer-based totals.

Open working demo · View cart source

HTML · CSS · JAVASCRIPT · LOCAL STORAGE

04 / Ledger Lane

An invoice dashboard with calculated totals, client search and filters, a local invoice-entry form, and protected CSV export.

Open working demo · View dashboard source

HTML · CSS · JAVASCRIPT · DATA INTERFACES · CSV EXPORT

WORKING METHOD

Agree scope first. Build design and interaction together. Check real flows and responsive layouts. Deliver reviewed source with setup notes. AI assists design and implementation.

Clearcut is a live product project. The other three are original fictional-brand demonstrations, not client commissions. No employment history, qualifications, testimonials, or performance results are claimed. View the portfolio.
